

Space Scribble

Design and draw your own Space Scribble pages with a black felt tip pen. You can draw planets, stars, spaceships, aliens, astronauts or entire space scenes. Use your imagination and draw anything that might come from outer space.

This graphic style is very bold and free. For inspiration, see some of the ideas on the next pages.

Objects don't have to look realistic.

Lines can be bold and free flowing.

You can then combine the black and white outlines with bright colour choices in text, pencil or pen.

You might find you have enough ideas to create a space cartoon or story.

If you would like to share your creations, you can upload a photo at the [Kids Club Online gallery](#).
